

# Joe Watson

joemwatson.github.io     watson@ias.informatik.tu-darmstadt.de  
Room E226, Building S2 | 02 TU Darmstadt, FG IAS Hochschulstr. 10, 64289 Darmstadt

## Education

<b>Technische Universität Darmstadt</b>	<i>Darmstadt, Germany</i>	<b>2018 - Present</b>
Computer Science Ph.D. Researching Robotics & Machine Learning at the Intelligent Autonomous Systems Lab, supervised by Prof. Jan Peters		
<b>Peterhouse, University of Cambridge</b>	<i>Cambridge, UK</i>	<b>2012 - 2016</b>
Information & Computer Engineering MEng, BA (Hons)    Distinction, First Class Modules include: Robotics, Computer Vision, Statistical Pattern Processing, Digital Filters & Spectrum Estimation, Nonlinear Systems & Control Jack Weinstock Prize for Electrical and Information Sciences (2016, 2017)    Peterhouse Engineering College Prize (2015, 2016, 2017)		
<b>Honours</b>	Charles Babbage Senior Scholarship of Peterhouse (2015-2017)    2 <sup>nd</sup> Year Integrated Design Project Prize (2014) Engineering Professors' Council Essay Prize, Highly Commended (2013)    1 <sup>st</sup> Year Computing Prize (2013)	

## Experience

<b>Software Engineer, CMR Surgical</b>	<b>Cambridge, UK</b>	<b>Autumn 2016 - Winter 2018</b>
<ul style="list-style-type: none"><li>• Worked on developing Verisus, a novel robotic system designed to revolutionize laparoscopic surgery through, to CE Mark accreditation</li><li>• Focused on the Control and Signal Processing algorithms for the manipulators, through research, experimentation and software development using C and Python</li><li>• Implemented software features for microcontroller subsystems of the product from requirements to tests</li><li>• Contributed towards the technical documentation of the microcontroller subsystem, included the technical specification, test specifications and risk analysis</li></ul>		
<b>Deep Learning for Robotic Grasping</b>	<b>University of Cambridge</b>	<b>2015-2016</b>
<ul style="list-style-type: none"><li>• Self-motivated 4th Year research project supervised by Dr. Fumiya Iida and assessed by Prof. Roberto Cipolla</li><li>• Trained a Convolutional Neural Network for real-time grasp prediction and implemented it on a robotic system</li><li>• Used Rethink Robotics' Baxter robot, Microsoft Kinect, ROS and Caffe. Graded First Class and published as a conference article</li></ul>		
<b>The Technology Partnership (TTP Meteor)</b>	<b>Cambridge, UK</b>	<b>10 weeks, Summer 2015</b>
<ul style="list-style-type: none"><li>• Undertook an internal research project the industrial printing division of a technology consultancy</li><li>• Research involved developing and investigating the use of system identification and machine learning algorithms in their products</li></ul>		

## Publications

### CONFERENCE ARTICLES

Watson, J., Hughes, J., Iida F. (2017) Real-World, Real-Time Robotic Grasping with Convolutional Neural Networks.  
In *18th Towards Autonomous Robotic Systems (TAROS) Conference*    [link.springer.com/chapter/10.1007/978-3-319-64107-2\\_50](https://link.springer.com/chapter/10.1007/978-3-319-64107-2_50)

## Skills

<b>Programming Languages</b>	<b>Software Packages</b>	<b>Platforms</b>
C, Python, MATLAB, C++	ROS, Pytorch, TensorFlow, OpenCV, Simulink	Windows, Linux
<b>Version Control</b>	<b>General</b>	
git, svn	LaTeX, Graphic Design (Adobe Photoshop, Illustrator, Indesign, Premier Pro), Fine Art	
<b>Interests</b>		

### Academic

Model-based Reinforcement Learning, Optimal Control Theory, Approximate Bayesian Methods, Generative Models  
**General**

Silkscreen printing, graphic design, socioeconomic impact of automation, epistemology of information technology, algorithmic art
